Dear Legislators, House and Senate Judiciary:

I guess my national notices to federal and state legislators are beginning to pay big dividends. Arlen Specter is gone and if I have anything to do with it many more will soon follow.

After 10 years of notices to you and your colleagues, you still refuse to stop the obstruction of justice in Kansas City. Instead of stopping the obstruction you replaced John Wood with Beth Phillips whose husband worked directly with Bradley Schlozman and John Wood in helping cover up the endless crimes documented in the 16th circuit courts and now on appeal, Missouri SC90861.

US Attorney Beth Phillips was nominated by President Obama as a favor to Senator Claire McCaskill so that none of her 16th circuit associates would be held accountable for the endless criminal misconduct and obstruction of justice.

US Attorney Beth Phillips is the wife of the honorable 16th Circuit judge Brent Powell whose former law firm Lathrop & Gage fraudulently defended Novation LLC for over 10 years and is still protecting criminal misconduct in our 16th Circuit courts of Missouri.

So legislators this is what we have!

We have the highest law enforcement official in Kansas City US Attorney Beth Phillips whose husband is a Missouri 16th Circuit judge that worked directly with Bradley Schlozman and John Wood during the preceding 10 years of criminal misconduct.

This is how Senator McCaskill, USA Beth Phillips and her husband the honorable judge Brent Powell coordinate the cover up and protected criminal misconduct for local officials and officers of the court.

The real question is how many more of you will continue to ignore my complaints and follow Senator Specter out the door?

Can you imagine what FOIA & SORA requests will expose in the communication between Senator McCaskill, USA Beth Phillips and her husband the honorable judge Brent Powell?

The following links are a complete factual outline of the continued misconduct under the direction of Senator Claire McCaskill, US Attorney Beth Phillips and the honorable judge Brent Powell?

For the past quarter century I have built healthcare technology solutions to reduce the cost of hospital supplies and to assist with the medical needs of our growing retirement and elderly population.

During this past decade I have litigated in our federal and state courts desperately trying to enter the healthcare supply market with the cost saving technology and solutions that I built.

Because our courts refuse to enforce our laws as the legislature intended, courts are no longer effective protecting our property rights or enforcing competition in our markets.

I have made numerous requests and inquiries to the House and Senate Judiciary, the Missouri Board of Bar Governors and the USDOJ in Washington and Kansas City about my property and constitutional rights being illegally taken from me in these courts.

Billions of dollars will continue to be illegally siphoned out of our federal and state budgets by these criminals.

The following is a small example how my property and rights were illegally taken at the hands of our public officials (USDOJ & FBI) and US courts. This is how you and I suffer due to the theft of honest public services.

Antitrust:

Retaliation:

My state is a cesspool of corruption and these links show how we desperately need real law enforcement and immediate legislation to correct our courts and public officials.

The facts and the records prove that Americans do not have accessible alternatives to the high cost of monopolized insurance or medical care and how public officials continue to cover up the criminal misconduct in our markets and our public officials.

Healthcare costs have destroyed our markets, budgets and ability to compete worldwide.

Accountability is the only answer!
